

CLIL for STEAM

Project Number: 2019-1-PL01- KA201-065027

SALE TIME

After watching the video about percentage, answer the following question. In which shop would you buy the shirt, knowing that its initial price is 10 € in both cases? Explain your choice.

Shop 1

Shop 2

1. Shop 1
2. Shop 2
3. Pointless question, the final price is the same both shops.

Solution.

Applying the 30% discount first, the initial price of 10€ becomes 7€.

Then applying the 20% discount at this 7 € the final price is 5€ 60 cents.

While half price, which is 50% discount, is only 5€.

So shop 2 is more convenient.

Remember, you can't just add percentage rates like simple numbers!
